

## Image text Pirna

– short version –

### **Pirna – sandstone which is full of life**

Colourful, beautiful and natural – made out of sandstone. Pirna's charm is so enduring because it has been carved out of this sandstone. One ingenious 'inventor' shaped it like this: nature. From this, architectural masters then created one of Saxony's most beautiful towns. The secret of its very special appeal lies in a very happy relationship – with a unique rock landscape, the Elbe Sandstone Mountains. This is part of our attitude to life which can be felt everywhere you go: in the bustling alleys, rustic inns, on the world-famous marketplace and at the merry street festivals. Even the Italians fall in love with this unique allure – Canaletto, for example. Whoever see Pirna will understand why.
